OBJECTIVE: This author's primary objective is for a statutory record of his education, and accomplishments thereof

**RELEVANT
EDUCATION**
1980 -1983

FLORIDA STATE UNIVERSITY
ARTS AND SCIENCES
Tallahassee, FL 32306.1011

DBL: Philosophy/Political Science
Bachelor of Arts

30 APR 1983

Major Courses Include:

Greek Philosophy
19th Century Philosophy
Reasoning & Critical Thinking
Urban Politics
Politics of the Masses
Administrative Law

3yr Army ROTC Scholarship applied to FSU Chairman
University Union Board '82 & '83
Scholarship House Business Manager
Outstanding Union Board Member
VP Student Affairs Advisory Committee
Basic Studies Honors Committee
Union Expansion Committee
Coordinating Chairman
Recreation Policy & Use Committee
Student Allocations Committee Charmin
Army ROTC Scout Commander
Reserve Assn Delegate to Wash. D.C.

2006 Marquis' WORLD Who's Who
2005 Marquis' WORLD Who's Who
2004 Marquis' WORLD Who's Who
& 2001 Marquis' WORLD Who's Who

The most notable accomplishment of this author is the following mnemonic technique devised as a compensatory method for this author's deficient memory. Fortunately copyright protection has been afforded by publication in the above notable publications. This author is continuing to propagate the mnemonic technique through lectures at AAPT (American Association of Physics Teachers). The 100 word mnemonic narrative follows:

While in the Army, Mr. Schunicht was involved in the Army, Mr. Schunicht was involved in a mid-air collision rendering him unconscious for three weeks. Everything had to be re-learned, as nursing actions were reported as being displayed upon awakening from the extended unconsciousness (19 days). Studies in recovery brought about some pragmatic discoveries to compensate for the residual memory deficits. The most valuable discovery was having each vowel represent a mathematical sign, i.e. "a" for multiplication implying @, "o" for division implying "over", "i" for subtraction implying "over", "u" for addition implying "over". And "e" implying "equals". Most constants and variable are indeed consonants, e.g. "c" = "speed of light", & "z" = "altitude".

The enclosed DVD is a telecast portion (2:40) of a talk given at SU-NY (Syracuse University- New York) '07. This author's speaking skills may be viewed

Another talk about this mnemonic technique is to be conducted 23 JULY University of Alberta CANADA.
