PHYSICS EDUCATION  
SUMMER MEETING MINNEAPOLIS, MN

**GG01: 1-1:10 p.m. Dr. Seuss Made Physics Easy 4 Everyone!**

*Contributed – Shannon A. Schunicht, Texas A&M, 6773 Bendwood College Station, TX 77845-3005; sschunicht@gmail.com*

The study of Physics is overwhelming 2 most everyone! In particular, the non-physicist who has no interest, nor need for further studies. This is particular the case for this author who was involved in a mid-air collision to be rendered unconscious 4 three weeks. Everything had 2 b relearned, as nursing actions were reported as having been displayed upon awakening from the extended unconsciousness (19 days). Studies n recovery brought about a pragmatic discovery 2 compensate 4 the residual memory deficits. In particular, having each vowel:mathematical operation; i.e. a:multiplication => @, o:division => over, i:subtraction => minus, u:addition => plus, & e:equals. Most constants and variables are indeed consonants, e.g. z=altitude, s=reaction rate. Using this mnemonic technique, ANY FORMULA may b made into a memorable work/phrase. \*\*\*\*\*Upon attendance this author may be spied speaking with a hole in my head, or viewed on this author's web: [mnemonicwritings.com](http://mnemonicwritings.com). The application of this mnemonic technique 2 Eastern characters has yet 2 b explored. Regardless its academic potential remains limitless as Delta X =

Sample cards with [vowels:Mathematical Operations] will be distributed. Also, it includes alternative equations, as well an area 2 submit any devices, acronyms with your name 2 b used n future works.
